MEMORANDUM FOR THE RECORD

SUBJECT: Conversation with [Redacted] Director, NRO Staff
re OXCART Photographic Take Sample for PFIAB

25X1

1. At approximately 1030 hours on 5 February, [Redacted] called to ask if we could make available to his office samples of the OXCART photographic take obtained from Type 1 and Type 2 packages. He said that these samples were required by the DNRO so that the latter could make them available for viewing by the PFIAB the afternoon of the 5th of February.

2. [Redacted] related that [Redacted] had briefed the PFIAB the morning of the 5th on developments in the NRP since his last briefing in the autumn, and that as a part of this presentation he had included a status report on Project OXCART. Apparently the question came up as to whether or not there were samples of the photography which the board members could see, and [Redacted] promised to see if he could not deliver them.

3. [Redacted] took action with D/Tech to make the samples available to a courier from the NRO Staff who was scheduled to arrive that noon. [Redacted] was going to view the photographs first, then pass them on to the board. These were the samples taken at mach 2.9 and an excess of 75,000 feet.
